

Genus UI for Nuxeo

Elevate your Nuxeo
User Experience
with Unparalleled
Flexibility and Efficiency

Genus UI for Nuxeo

The Genus UI for Nuxeo is a game-changer for Nuxeo customers seeking flexibility and control over their user interface (UI). The new UI makes tasks like locating, viewing, and creating content quicker and more intuitive. As a result, training needs go down and user satisfaction and adoption increase.

The Genus UI utilizes the configurations made in Nuxeo Studio when displaying items such as search and document layouts, tasks, custom action buttons, and collections. This makes the transition from the Nuxeo Web UI to the Genus UI simple. It still allows you to seamlessly take advantage of Nuxeo Web UI upgrades and provides administrators a familiar method for UI updates and changes.

The Top 6 Benefits of Implementing Genus UI for Nuxeo

- > **More Screen Real Estate:** The “drawer” is gone! A less intrusive menu has replaced the “drawer” and more intuitive action blocks are displayed on the dashboard to ease navigation. With more real estate to work with it's easier to get immersed in what's important, your content.
- > **Increased Efficiency and Faster Task Completion:** The intuitive and modern interface streamlines navigation and task completion. This leads to increases efficiency, time savings, and a more satisfying user experience.
- > **Improved User Adoption:** The easy-to-use Genus UI requires little to no training, expedites roll-outs, and minimizes the time and expense associated with training leading to increased user adoption and faster ROI.
- > **UI Extensibility:** The Genus UI framework empowers organizations to more easily extend the user interface to create experiences that match the unique needs of your users ensuring a truly user-centric solution across a wide range of use cases.
- > **Streamlined Content Access and Search:** The Genus UI significantly improves the speed at which users can find relevant information with the 3-click approach - 3 clicks to create or 3 clicks to content.
- > **Customizable User Experience:** Easily create dashboards, menus, and actions that perfectly align with the workflows, requirements, and user preferences.

 - User Actions for Profile Updates and Logout
 - Administrator Actions
 - o Analytics
 - o Users & Groups
 - o Vocabularies
 - o Audit
 - o Cloud Services
 - o Link to Nuxeo JSF Administration

Technical Overview

The Genus UI for Nuxeo is installed as a standard Marketplace Application. The Genus UI runs as a web application in parallel to the Nuxeo Web UI and leverages Nuxeo web components, as well as custom elements contributed in Nuxeo Studio. The Genus UI can be configured in your Java project or Studio project via HTML bundle files. This allows configuration of the newly contributed Genus UI slots such as action blocks, Genus UI search pages, and grid item quick actions.
