

Move up to TotalAgility: advance from document capture to AI-enabled intelligent processing

Transform content-heavy workflows into insight-driven action

You've built a strong foundation with Transact – now it's time to take the next step.

TotalAgility combines intelligent document processing, workflow automation, and knowledge discovery in a single AI-powered platform. Automate manual work, streamline end-to-end processes, and uncover real-time insights that drive faster, smarter decisions.

Upgrade to TotalAgility and unlock a range of benefits:

Smarter AI-powered document automation

Faster deployment with Tungsten Copilots

Automation that extends beyond capture

Scalable, flexible cloud options

Built-in security and governance

Current Challenge	With TotalAgility	Results
Simple changes take forever	Set up new documents in hours with AI	Same-day response, faster ROI
Maintenance drains my IT budget	Cut processing costs in half	Free up to \$200K+ annually
My team drowns in manual work	Process 3x more documents	Clear backlogs meet deadlines, reduce stress
Nothing talks to each other	300+ connectors automate data sharing	Eliminate errors get real-time visibility
Only IT can make changes	Business users build workflows themselves	Reduce IT dependency empower every team
We're stuck with expensive servers	Deploy anywhere you want	Scale without costly infrastructure
Training new people takes months	Get users productive in days	Faster onboarding lower training costs
